

# **ASAP Global Alliance Summit**

## **Going Virtual June 23 – 25, 2020**

The global health crisis involving COVID-19 has obviously forced all of us to change how and where we're working, living, and where we're going (or not going). After carefully evaluating all of our options and closely monitoring information from both government and industry leaders, we have determined the need to move the face-to-face conference to a virtual one instead. This is an exciting opportunity for ASAP and our community as we look to provide the same meaty content to all of our attendees virtually.

The virtual conference will offer you both a livestream event for a few hours each day June 23–25, and on-demand sessions to listen to as attendees' schedules allow. The new format promises to be a quality learning experience that affords engagement during the livestream sessions and flexibility and access to all the on-demand recordings.

Over the coming weeks, the ASAP team will provide additional information regarding the virtual agenda and conference access. To stay up to date visit [www.asapsummit.org](http://www.asapsummit.org).
